Professional Summary

Dynamic **Senior Software Engineer around 4 years of experience** driving automated testing excellence. Expert in collaborating with product teams, architecting and maintaining robust testing frameworks, and scripting test cases in C# and Java using Selenium and Rest Sharp. I am interested in UI, API and Desktop testing, generating insightful test reports, and leveraging Agile methodology to ensure high-quality software delivery.

Skills

- **Programming Languages:** C# (Primary Language), Java
- **Automation Tools:** Selenium, WinAppDriver, RestSharp, SpecFlow, Reqnroll, Cucumber, Postman, Swagger, MS-Test, TestNG.
- **DevOps & Version Control:** Azure DevOps, Git, GitHub.
- **Test Data Management:** GenRocket Engineer, GenRocket Admin.
- **Testing Frameworks:** BDD (Behavior-Driven Development), Key Data Driven (KDD) framework.
- **Databases & Connectivity:** MySQL.
- **Test Management & Collaboration Tools:** Jira, Azure Test Plan, TestRail
- **Soft Skills:** Problem-Solving, Critical Thinking, Team Collaboration

Education

A.K. S University, B. Tech Mining Engineering, Satna, Madhya Pradesh.

June 2017 – May 2020

- CGPA: 8.27/10

Experience

Senior Software Engineer, Mphasis - Bangalore.

June 2025 – Present

- Tested applications developed **with LLM services**, ensuring accuracy, performance, and seamless integration across environments.
- Developed **performance reports** by evaluating log data and key metrics for application stability.
- Designed and executed test cases to validate functionality, responsiveness, and stability.
- Automated functional and UI testing using WinAppDriver and C#, reducing manual testing effort.

Test Automation Engineer, Tata Consultancy Services Limited - Hyderabad.

May 2022 – June 2025

- Developed and implemented a BDD testing framework, improving testing efficiency by 30%.
- Enhanced test reporting with Extent Reports and Living-Doc, increasing stakeholder satisfaction by 20%.
- Collaborated with over 47 product teams, boosting testing efficiency by 20%.
- Developed innovative automated testing procedures by evaluating client requirements and software functionalities, achieving a 40% improvement in testing efficiency.
- Implemented CI/CD pipelines using GitHub and Azure DevOps, improving the efficiency of the test coverage, increasing by 25%.
- Developed complex functional automation that decreased manual testing by 60%

Projects

HP (Hewlett-Packard)

June 2025 – Present

(Information Technology – Consumer Electronics / AI Software)

- Designed and implemented automation frameworks in C# and WinAppDriver for AI-driven applications.
- Validated performance, responsiveness, and integration of AI software solutions.
- Performed manual and automated testing (UI, API, desktop), ensuring functional accuracy and performance.
- Reported and tracked critical defects in Jira/TestRail, driving faster resolution.
- Suggested application enhancements based on testing insights, improving responsiveness and stability.
- Integrated automation into CI/CD pipelines with Azure DevOps, accelerating release cycles.
- **Tools Used:** C#, WinAppDriver, Selenium, RestSharp, Reqnroll, GitHub, Azure DevOps, TestRail, Jira.

MetLife Investment Transition

Mar 2022 – June 2025

(Banking, Financial Services, and Insurance)

Developed a BDD testing framework, enhancing testing efficiency by 30%. I improved test reporting visibility, increasing stakeholder satisfaction by 20%, and collaborated with over 47 product teams, boosting testing efficiency by 20%. Additionally, I used CI/CD pipelines with Azure DevOps, streamlining deployment and automating test cases, which improved application test coverage by 25%.

- **Tools Used:** C#, Java, Selenium, RestSharp, Spec Flow, GitHub, Azure DevOps, MySQL, GenRocket, TestNG, Azure Test Plans.

Experience

Graduate Engineering Trainee, NLC India Limited-Chennai, Tamil Nadu, India

Jan 2021 – Feb 2022

- Identifying and mitigating risks to worker safety and health and developing and implementing safety procedures and training programs.
- Managing and coordinating the work of supervisors, engineers, technicians, and other mine workers.

Certifications

GenRocket Certified Engineer-Level 1: Certified from **GenRocket**, Issued Nov 2024.

Software Testing Certificate: Certified from **The Digital Adda**, Issued Nov 2024, Credential ID DA/ST/23/15800.

Accomplishments

- Received multiple appreciations from customers and stakeholders for effective test management and issue resolution.
- Developed and implemented a BDD testing framework, improving testing efficiency by 30%.
- Enhanced visibility and accessibility of test results through detailed reporting, increasing stakeholder satisfaction 20%.

Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
